

# How it Works

1. Login to the OceanFinder portal

2. Select your location

3. Choose the OceanFinder product that matches your requirement

4. Set your preferred tasking parameters

5. Add your chosen products to your basket

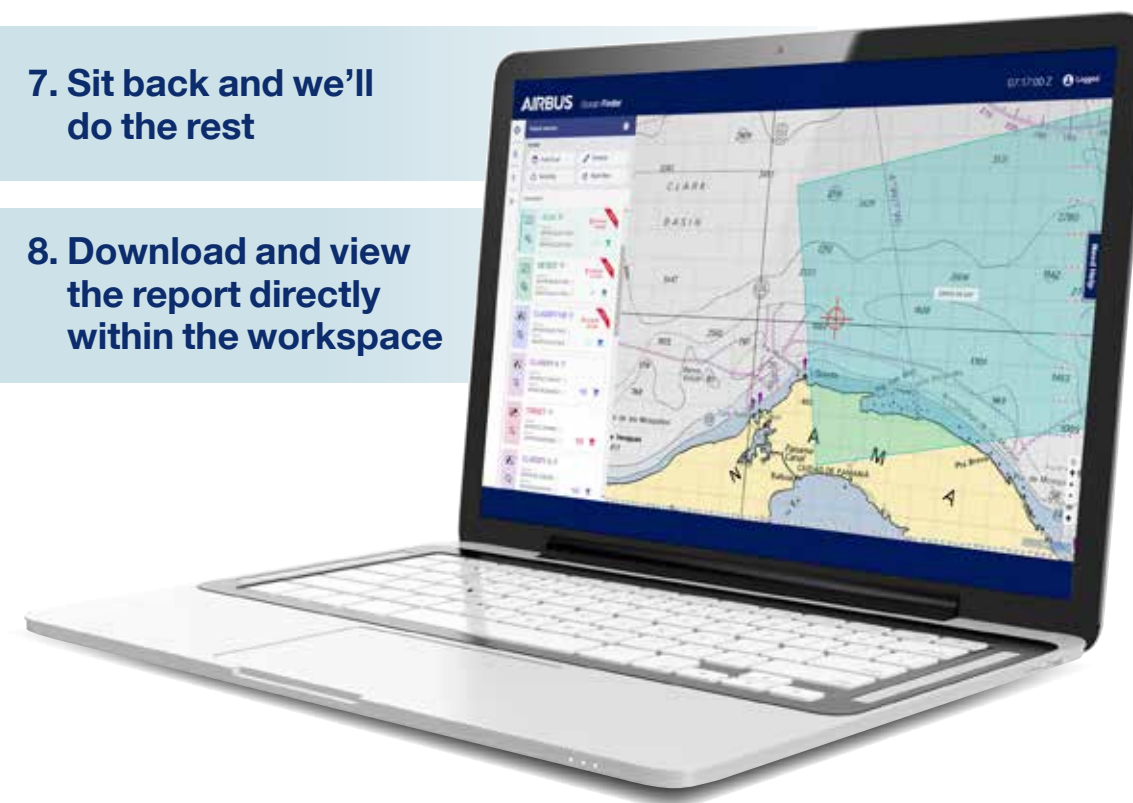

6. Confirm your order

7. Sit back and we'll do the rest

8. Download and view the report directly within the workspace

**OceanFinder**  
Locate, Identify and Track  
Ocean Assets and Activities  
Powered by OneAtlas

OceanFinder is a solution powered by OneAtlas, the digital platform of Airbus Defence and Space, Intelligence. OneAtlas is an industry-leading collaborative environment, designed with and for you, to access premium imagery, perform large-scale image processing, extract industry-specific insights and develop the smartest geospatial solutions.

# How Can OceanFinder Help You?

## Keeping an Eye on Activities at Sea

The ocean is the least monitored area on the planet. **OceanFinder makes the ocean more visible to you.**

OceanFinder is a unique and innovative self-ordering service delivering fast satellite-based maritime detection and identification reports to monitor ships and activity at sea.

Using the most complete earth observation constellation, we improve crew and cargo safety.

**Search and rescue operations**

**Ensure safety in hostile areas:**

Tracking your vessel during a particular period of time.

**Detect illegal activities, such as drug trafficking:**

Enables ship classification and highlights dark vessels.

**Environmental applications:**

Illegal bunkering, oil spill monitoring and Ice Flow monitoring.

**Insurance fraud**

**Illegal fishing activities**

**Relocate missing and hijacked ships:**

Tracking an emergency to ensure the safety of your fleet.

**Operations:**

Standard and 24/7 emergency mode available.

**Manage your fleet:**

Our service enables you to monitor your fleet's activity.

## What You Get

**Self-selection of the appropriate product** depending on the kind of vessel or activity to be detected/identified.

**Satellite sensor activation** with the relevant priority to ensure a successful mission.

**Global coverage** that is both weather independent and highly cost-effective.

**Improved analysis**, algorithms and correlation with AIS data.

**Complementary sensors** - our constellation offers the ideal combination between coverage and resolution.

**Boat Locator prediction tool** - indicate the speed and position of vessels to predict route and projected location.

**Report production**, including AIS signal correlation to pinpoint non-reporting assets if relevant.

**Can be activated in routine mode**, for background intelligence, as a one-off or on a regular basis.

**For planned or unplanned operations**, rapid delivery can be activated to ensure the information is as fresh as possible.
