Tutorial Overview

Skills To Be Acquired

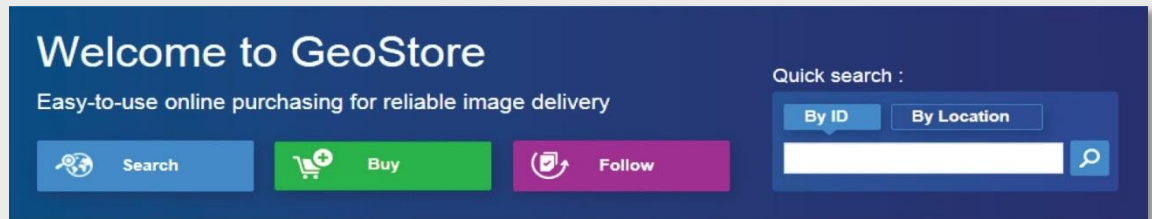

The following points will be explained in detail in this User Guide

- ✓ Display custom WMS flows
- ✓ Save your preferred layers in a project

Any questions? Please check our [FAQ section](#) from the GeoStore homepage

Go To The Map

Go to www.geostore.com in your web browser. We recommend Mozilla Firefox or Google Chrome: check for [supported versions](#) below the Questions and answers section.

Click on  **Search**

from the GeoStore home page if you just need an overview of the archive products

Or

Click on  **Buy**

from the GeoStore home page if you plan to order archive products, then ...

Click on  **Login**

and enter your e-mail address and password

Change Background and overlay layers

Click on  at the bottom right hand corner of the map to display the layers list

				Layers	Opacity
<input type="checkbox"/>				WMSC WorldDEM	<input type="range"/>
<input type="checkbox"/>				WMSC SPOTMaps2.5	<input type="range"/>
<input type="checkbox"/>				WMSC SPOTMaps1.5 + KML	<input type="range"/>
<input type="checkbox"/>				WMSC SPOTMaps1.5	<input type="range"/>
<input type="checkbox"/>				WMSC Elevation30	<input type="range"/>
<input type="checkbox"/>				WMSC Open Street Map	<input type="range"/>
<input type="checkbox"/>				WMTS World Imagery	<input type="range"/>
<input checked="" type="checkbox"/>				WMTS World Street	<input type="range"/>

[Add Layer](#)

Tick the boxes to change the background of the map (World Imagery, World Street, Open Street Map) or to overlay the different product coverages

Any questions? Please check our [FAQ section](#) from the GeoStore homepage

Set A New Layer Using WMS Flows

Click on **Add Layer** in the panel to scroll down the panel and display the following fields: Type, URL and Name

Select WMTS (Web Map Tile Service) to add pre-rendered georeferenced map tiles from a URL and overlay them on the map

Select WMS-C (Web Map Service - Cached) to add pre-rendered georeferenced map tiles on the map (former WMTS protocol)

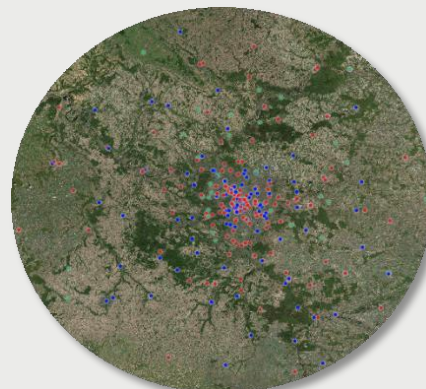

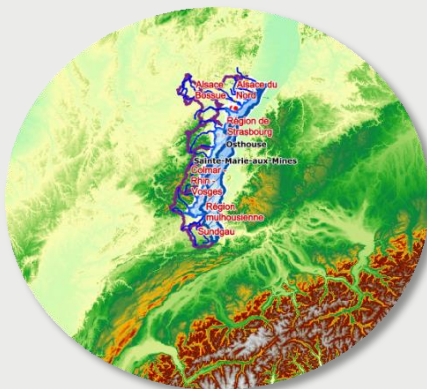

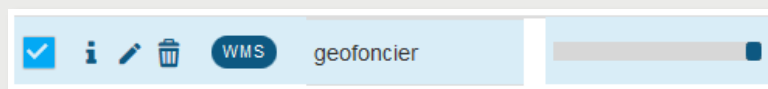

Select WMS (Web Map Service) to add georeferenced map images tiles from a URL and overlay them on the map

Select KML to add KML layers from a URL and overlay them on the map

Enter the new layer URL in the appropriate field. Please ensure the URL you entered uses the HTTPS protocol; addresses with simple HTTP protocol might not work as they are unsecured connections

Enter the name of your new layer (mandatory) and press OK to add it to the list

Tick the box next to your layer's name to display it on the map
Adjust opacity with the scale button

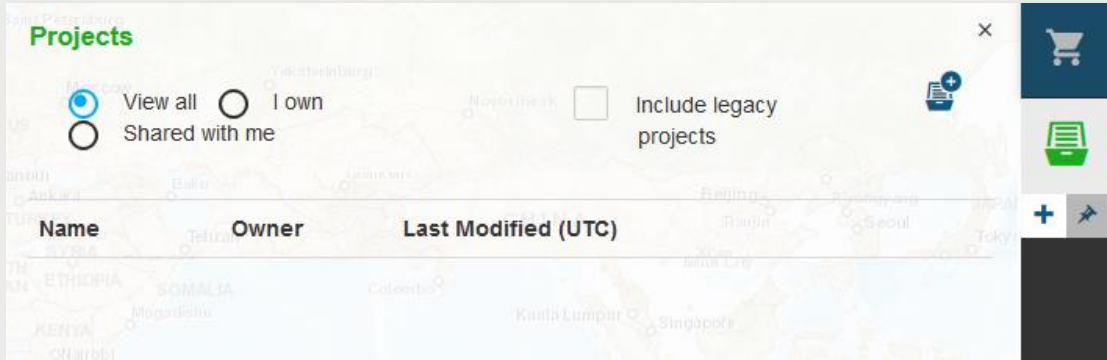

Any questions? Please check our [FAQ section](#) from the GeoStore homepage

Save Your Custom WMS Flows In GeoStore

Click on

on the right hand side of the map to create a project in order to save your custom WMS layers so that they can be displayed the next time you consult GeoStore.

Click on

below the project icon or on

to create a new project

Enter a name for your project (mandatory) and describe its content to remember which layers are saved within this project for instance.
